Portfolio

PROFESSIONAL SUMMARY

Senior Flutter Developer with **5+ years** of experience and **40+ production-ready apps** for iOS and Android. Integrate AI solutions into apps — LLM assistants (OpenAI, Gemini APIs), streaming chat, and on-device intelligence with ML Kit and TensorFlow Lite. Build AI-based applications with Clean Architecture, BLoC, Riverpod, Provider, and GetX, plus Firebase, REST APIs, and real-time features.

CORE TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android Native, Flame, Java, Kotlin

Architecture & State Management: Clean Architecture, MVC, BLoC, Riverpod, Provider (ChangeNotifier), GetX

Backend & APIs: REST APIs, Firebase Authentication, Firestore, Realtime Database, Cloud Functions, FCM

AI & ML Integration: OpenAI API, Gemini API, Streaming Chat UI, Function Calling, ML Kit, TensorFlow Lite

Real-Time & Media: WebSockets, Agora RTC, Video Calling, Live Streaming

Maps & Location: Google Maps, Location Services, Live tracking, Geofencing

Payments & Monetization: In-App Purchases, Payment Gateway Integrations, Google Mobile Ads

Tools: GitHub, Jira, Platform Channels, Flutter Animations, Localization (i18n), Crashlytics, Sentry

Testing & Quality: Unit & Widget Tests, Integration Tests, Mockito, DevTools Profiling

Local Storage: Realm, Hive, SQLite (Drift)

Deployment: GitHub Actions, Codemagic, Fastlane, Google Play Console, App Store Connect, CI/CD pipelines

PROFESSIONAL EXPERIENCE

Senior Flutter Developer

A2Z Innovation | Oct 2025 - Present

- Build AI-powered features into production apps — on-device computer vision with TensorFlow Lite and ML Kit (Flynet Security person detection, Safrly boarding head-counts), plus LLM assistants (OpenAI, Gemini APIs).
- Develop cross-platform Flutter/Dart apps using BLoC, REST APIs, Firebase, and FCM across Safrly (Parent, Driver), Thardi (User, Driver), Travel and booking App, and Flynet Security.

Senior Flutter Developer

CodePul | May 2023 - Sep 2025

- Developed large-scale Flutter applications with BLoC, Provider, Riverpod, and GetX for state management.
- Delivered production releases with REST APIs, Firebase services, and push notification integrations.
- Built AI features — Clust driver matching & ETAs, KollySM recommendations, Clodocs triage, Fillao smart replies.

Flutter Developer

CAS (Center for Advance Solutions) | May 2021 - Apr 2023

- Led Flutter application development with scalable architecture using BLoC, Riverpod, and Provider across Mehar's Kitchen, CAS ELMS, and Invitor.
- Integrated Firebase, REST APIs, and payment gateways into production applications.
- Mentored junior developers, conducted code reviews, and collaborated with clients on requirements and delivery.

Android Developer

CAS (Center for Advance Solutions) | Jun 2020 - Apr 2021

- Built native Android applications in Java and Kotlin, covering UI, API integration, and Google Play Store releases.
- Transitioned from native Android development into Flutter for cross-platform delivery.

SELECTED PROJECTS

Clust

Ride-hailing platform in **Albania** with Customer (**10k+ downloads**) and Driver (**1k+ downloads**) apps for AI-matched ride requests with predicted ETAs, trip tracking, earnings control, real-time updates, and smart notifications. Built in Flutter with Firebase Authentication, Realtime Database, REST APIs, and Provider.

Flutter | Firebase Authentication | Realtime Database | REST APIs | Provider

Flynet Security

Enterprise-grade security app for monitoring and managing CCTV cameras with real-time video streaming and on-device AI person & vehicle detection (TensorFlow Lite). Delivered a BLoC-based Flutter architecture integrated with Firebase and REST APIs.

Flutter | Firebase | REST APIs | BLoC

Safriy

Saudi Arabia student pick-and-drop platform with Parent and Driver apps plus an admin panel. Parents add students; admins assign students from schools to drivers and buses, with real-time tracking, AI-predicted bus ETAs, and ML Kit face-detection boarding head-counts. Live on the Play Store. Built in Flutter using Provider and BLoC with Firebase and REST API integrations.

Flutter | Firebase | REST APIs | Provider | BLoC

KollySM

E-commerce and Delivery platform with product catalogs, cart, personalized AI product recommendations, secure checkout, and a delivery side for order fulfillment. Developed in Flutter using Riverpod with Firebase and REST API integrations.

Flutter | Firebase | REST APIs | Riverpod

Clodocs

Telemedicine platform for appointment booking, AI symptom triage, and secure video consultations via Agora RTC. Implemented the Flutter application with Firebase and REST API integrations using GetX for state management.

Flutter | Firebase | REST APIs | GetX | Agora RTC

Fillao

Service-booking marketplace connecting users with local vendors, with AI smart replies for customer conversations. Built in Flutter with GetX, Firebase, and REST API integrations.

Flutter | Firebase | REST APIs | GetX

CAS ELMS

Learning Management System for courses, assignments, and grades online. Contributed offline/online geofencing-based auto attendance using BLoC in Flutter with Firebase and REST API integrations.

Flutter | Firebase | REST APIs | Geofencing | BLoC

Invitor

Event and invitation app for creating and sending animated cards. Built in Flutter with Firebase and REST API integrations.

Flutter | Firebase | REST APIs | BLoC

Sweeft

Multi-service platform with three apps: Customer (multi-vendor bookings, orders, real-time tracking), Driver (order acceptance, delivery tracking, assignments), and Store (products, inventory, and orders). Built with Flutter, BLoC, Firebase, and REST APIs.

Flutter | Firebase | REST APIs | BLoC

EDUCATION

BACHELOR OF COMPUTER SCIENCE – Islamia University of Bahawalpur, Bahawalpur, Punjab, Pakistan
